### *Celebrate India's Festival of Giving - 2 to 8 October!*

#DaanUtsav (earlier called the Joy of Giving Week) is India's 'festival of giving'. Launched in 2009, the festival is celebrated every year – commencing on Gandhi Jayanti – from October 2 to 8. From auto rickshaw drivers to CEOs, school children to celebrities, homemakers to opinion leaders and media personnel, millions of people from all walks of life come together during this week to give their time, money, resources, or skills back to society.

Jishnu Shaji, Amrutha Varma A, Alfred Rajan Thomas, Bijeesh K K, Vishnu C V

Asset recovery and renovation of Adoor General Hospital On behalf of NSS UNIT of College of Engineering Aranmula, we wish to contribute to the society to feel the joy of giving in theme with the Daan Utsav by renovating Adoor Government General Hospital recovering and repairing the damaged assets so as to double its capacity. Adoor Government General Hospital is in Pathanamthitta district of Kerala. The hospital is equipped with Diagnostic Centre, Postpartum Sterillisation, Blood Bank, Neonatology, 24 Hour Casualty, Mortury, and Ambulance etc. Since the hospital is located in between 3 districts Pathanmathitta, Alappuzha & Kollam, Most of the Accidents cases are addressed by Adoor hospital. 2000 out patients visits hospital daily and 600+ patients seek admission to IP, but due to lack of furniture and facilities currently the hospital can accommodate only less than 350 patients only. An average of 15-20+ accidents cases are reported per day in Adoor General Hospital. But there are so many limitations for admitting and for the proper treatment because of the lack of facilities, equipments, and staffs. Even though huge no of patients, especially accident cases depend primarily on this hospital but there is no casualty for Trauma care unit. The surroundings of hospital are also not well maintained and lack proper hygiene, which may cause epidemic outspread. The metal items such as beds, drip stand, chair, and ICU bed Etc are got rusted due to lack of proper painting. Many of the equipment and furniture are dumped aside since they are damaged. There is only one entry of way for all peoples, ambulance, and accident cases, which cause a heavy rush in the way and thus makes it difficult for patients to enter hospital. We plan to build a new entry way other than the main gate in Adoor general hospital, so accident cases and ambulance can enter through this way and patients can use the main gate hence reduces rush in the

and patients can use the main gate hence reduces rush in the main gate. Statistical survey shows that there are various equipment and furniture including cots, beds, chairs drip-stands, Operation theatre machineries, ambulances and other vehicles are under maintenance whose no is double than those which are currently in use. We have planned a huge asset recovery by repairing and painting 800+ beds, 300+ chairs, 3 ambulances, 10 ICU bed etc. There is one building block which is abandoned for last five years and we can rebuild the block for use for Trauma care casualty. Out of the two operation theatres only one is being used currently, second one is abandoned due to electrical faults and machineries being not in working condition. We can repair the machineries and the correct the electrical faults with assistance from our faculty and lab staff to make the operation theatre fully functional. Overall we propose that we can regenerate the items, biological equipment, etc worth over 2 crores. This will double the capacity of the hospital thus benefiting over 1500 more patients daily. Along with the same we have planned to clean the surroundings of TB centre of Kozhenchery Government District Hospital, which is completely messed up with grass and creepers grown over the building making it dangerously susceptible to snakes as per the report published in Malayala Manorama News Paper. The initial survey and works have already started and we hope to finish all these work before 8th October 2017.

Like and share this video to ensure that this team wins the challenge.
